HUSAIN BASEM HASAN

HB

SOFTWARE ENGINEER / AI & CLOUD SYSTEMS

PORTFOLIO • github.com/Husain-Basem

AREAS OF EXPERTISE

- Applied AI & machine learning
- Cloud-native applications
- Software engineering
- Systems integration
- Technical education

TECHNICAL TOOLKIT

Languages

Python · Java · C# · JavaScript / TypeScript · SQL

Frameworks

React · FastAPI · .NET

Cloud & data

AWS · Azure · serverless · databases

Engineering

REST APIs · Linux · Git · automation

EDUCATION

Boston University

M.S. Computer Science & Artificial Intelligence
In progress

Bahrain Polytechnic

B.Sc. Information & Communication Technology
Programming & Networking

CERTIFICATIONS

AWS Certified Solutions Architect

AWS Certified Machine Learning Engineer

AWS Certified Cloud Practitioner

Microsoft Certified Azure AI Engineer

NVIDIA DLI Deep Learning Fundamentals

PROFILE

Software engineer and graduate student with experience building AI-enabled applications, cloud solutions, and enterprise systems. Interested in secure, scalable software that turns technical ideas into useful real-world applications.

RELEVANT EXPERIENCE

Applications & AI Specialist · Public-sector technology

- Develop and support enterprise applications, AI-enabled workflows, reporting, and process automation.
- Work with stakeholders to coordinate requirements, integrations, testing, and dependable system operation.

ICT Lecturer & Project Supervisor · Higher education

- Support computing instruction and supervise software projects, including technical implementation, documentation, and demonstrations.

Cloud & Software Engineering · Cloud, fintech & financial services

- Contributed to machine learning pipelines, cloud-native and serverless applications, and infrastructure automation.
- Supported service integrations, transaction workflows, testing, and cloud infrastructure administration.

SELECTED PROJECTS

SolarMap · AI-assisted solar potential analysis

Used image analysis and cloud technologies to examine rooftop solar opportunities and estimate potential capacity.

Parkaty · Smart parking concept

Applied computer vision to parking-space detection and license plate recognition, with digital payment workflows.

PROFESSIONAL HIGHLIGHTS

Bahrain eGovernment Excellence Award 2025 — Best Digital Initiative

Experience spanning public-sector technology, cloud engineering, financial systems, and ICT education.
